

Testimonial

I receive a call the other day from a customer asking me if I knew of a way to remove the smell of a skunk from inside of their home. Their dog was playing in the backyard and got sprayed by a skunk. I replied not a problem, do you want us to come over right away or within 24 hours. She replied right away, the customer lives in Burlington, which isn't a problem as we travel to Burlington all the time. She had three kids in the house and it was summertime and the kids liked playing in the house. We were able to get there and within the hour. We started to apply our product to the affected areas; within 24 hours the smell was gone. We received a call from the customer thanking us for responding as fast as we did. If you ever have a smell and you're not sure how to get it out, don't hesitate to give us a call. There are only so many smells and we have eliminated them all.
